

## Fort McClellan LUCAP Scope

Choccolocco Corridor 4,407.70 acres of the Choccolocco State Forest, formerly leased by the Army from the State of Alabama, with the lease term having expired on September 30, 1999. The Army is conducting an EIS/EA to characterize a suspected UIC site, and also plans to conduct site investigations for several other potentially contaminated sites, as identified in the EIS and ASD. Pending results of the EIS/EA for the suspected UIC site, the Army will seek the State's permission to impose land use controls (LUCs) (e.g., restrictions). Consistent with the terms of this LUCAP agreement, the Army will not develop an interim LUCAP to prescribe how LUCs will be managed and monitored until a final decision is reached. The Army will work with regulators to fully characterize sites within the Choccolocco Corridor, but any further decisions concerning LUCs and who will be responsible for any necessary LUCs are reserved for further negotiation between the Army and the State of Alabama.
